

"RICH PEPE" Meme Coin Whitepaper

RICH PEPE (\$PEPERICH) meme coin is a cryptocurrency designed to operate on the Solana blockchain. It was born from the desire for Pepe meme coin in the internet meme culture and the hope that it could one day become like Pepe meme coin. RICH PEPE does not follow the logic of VC or trading capital. It started with the idea of "Let's give it a try." It started with the idea of "If we try it once, it will work out somehow." Isn't it?

1. Introduction

In the rapidly evolving crypto world, meme coins have carved out a unique niche by combining investment, entertainment, and community culture. This is what creates "marketability." We know. If I'm the only one saying "1 dollar of RICH PEPE is 1 dollar," it doesn't mean anything. But if 10,000, 100,000, or a million people say "1 dollar of RICH PEPE is 1 dollar," the rest of the people will agree and think, "I guess so?" That's what I mean by "marketability." I'm going to give RICH PEPE away to a lot of people and gather a group of friends who will say "1 dollar of RICH PEPE is 1 dollar!"

2. Background

I saw PEPE succeed firsthand. That's why I issued RICH PEPE on the Solana blockchain. The ecosystem and novelty that other meme coins talk about are all fake. I created RICH PEPE because I wanted to be like PEPE. Anyway, if it fails, I'm screwed.

5. Conclusion.

I won't say anything grandiose. RICH PEPE will focus solely on 'marketability'. What kind of technology and vision does Meme Coin have? If many people use RICH PEPE, it will have enough value without technology or vision. That's the direction I want to go
